

Jiangmen Mingzhen Motor Vehicle Parts Co., Ltd

42 Years Focused on Seat Cushions | Since 1983 • Innovation for Mutual Success

Company Profile

Jiangmen Mingzhen Motor Vehicle Parts Co., Ltd. was established in 2020 and is a modern enterprise specializing in the research and development, production, and sales of motorcycle seat cushions. The company takes technological innovation as its core competitiveness and has accumulated more than 10 invention patents. Relying on advanced research and development equipment and testing systems, achieve full process quality control from raw materials to finished products. At the same time, the company has passed the ISO9001:2015 quality management system certification (execution standard: GB/T19001-2016), which runs through the entire production chain with military grade standards. Our products not only serve well-known domestic and foreign automobile manufacturers such as Dachangjiang, Yadea, and Tailing Motors, but are also exported to more than 40 countries and regions including the United States, the European Union, Japan, the Middle East, and Africa, winning global market recognition. Our company currently produces about 3 million sets of motorcycle and electric vehicle seat cushions annually. After the construction of the new factory, our company's annual output is expected to reach 5 million sets, with an annual output value of about 230 million yuan. Obtained multiple honors such as ISO management system certification, enterprise credit rating certification, demonstration enterprise for integrity culture construction, and technology-based small and medium-sized enterprise, and has a national quality inspection report, establishing an industry benchmark image. We are committed to providing customers with high-quality and comfortable seat cushion

p r o d u c t s .

Two major production bases

Jiangmen Mingzhen Motor Vehicle Parts Co., Ltd. was established in 2020; 2023 Jiangmen Second Factory (Guangdong Changling Motor Vehicle Parts Co., Ltd.)

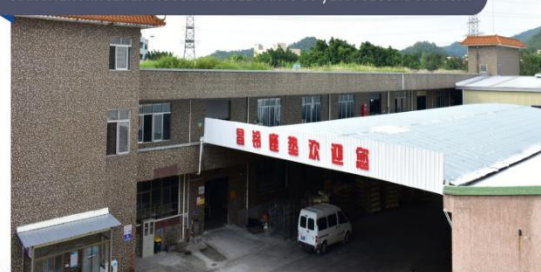

New factory building adds 33000 square meters

The total area of the company's existing factory buildings is about 20000 square meters. Our company will launch a new factory construction project from November 2025. The factory is located in the industrial zone of Yayao Town, Heshan City, Jiangmen. With its superior location advantage, it can further enhance the service efficiency and response efficiency to customers, laying a solid foundation for deepening cooperation.

JIANGMEN MINGZHEN MOTOR VEHICLE PARTS CO., LTD. FIRST FACTORY

JIANGMEN MINGZHEN MOTOR VEHICLE PARTS CO., LTD. SECOND FACTORY

production base

• Modern production and quality control system

The company has two modern production bases equipped with advanced production equipment and testing instruments to ensure stable and reliable product quality.

Advanced equipment

Introducing internationally advanced automated production lines to improve production efficiency and precision.

Strict quality control

Full-process quality inspection, from raw materials to finished products, ensuring zero defects upon delivery.

Stable and reliable

Standardized management system ensures the consistency and reliability of product quality.

Factory appearance

Workshop production line

Corporate culture

Always adhere to the business philosophy of 'technological innovation and integrity,' uphold the corporate spirit of 'rigorous, pragmatic, and innovative,' focus on ergonomic design to continuously optimize product experience, drive industry upgrades through patented technology, strive to build a lean enterprise, provide higher-quality cycling accessories and services to global users, and insist on Mingzhen saddles to make the best saddles.

Cultural promotion

Convey core values and unite the team

Promote safety knowledge

Integrated Management System for
Quality/Environment/Occupational Health
and Safety

Employee Development

Provide learning opportunities to support
employees' professional growth

advanced equipment

⚙️ Foam Sponge Equipment

Introduce advanced equipment with 2×40 seats to ensure the quality of core materials.

⚙️ Computer synchronous sewing machine

TYPICAL brand ensures precise and beautiful leather sewing craftsmanship.

⚙️ Fully automatic high-end cutting bed

TIMIN brand cutting bed achieves high-precision and high-efficiency cutting.

From source to finished product, fully automated equipment ensures production efficiency and superior quality.

production workshop

A clean and orderly environment

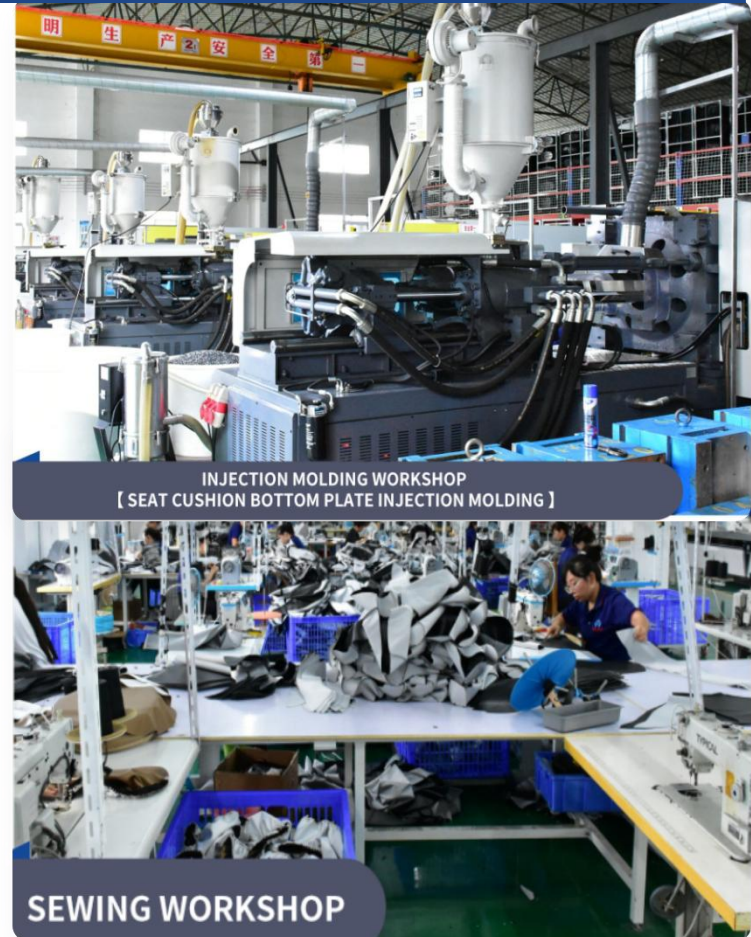

We focus on maintaining the production environment and creating the best conditions for efficient production and employee well-being.

Strict production process

From raw materials to finished products, every step follows standardized operating procedures to ensure efficient and reliable processes.

Comprehensive quality control

Multiple quality inspection checkpoints ensure that every factory product meets or even exceeds international standards.

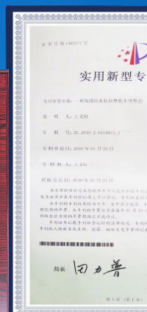

Realistic scenes of injection molding workshop and sewing workshop

Chuangxiang Technology

Continuously driving the upgrading of the transportation industry
through the application of basic science and technology
Multiple invention patents, utility model patents, and design patents

— Persist in making the Mingzhen seat cushion well —

quality certification *Quality Assurance*

Since its establishment, the company has successively passed ISO management system certification, has its own patents, quality management system certification certificates, integrity culture construction demonstration enterprise/entrepreneur, enterprise credit rating certification and other certifications, as well as a batch of national quality inspection reports! Continuously driving the upgrading of the transportation industry through the application of basic science and technology

Multiple **invention patents, utility model patents, and design patents**

Passed ISO9001:2015 quality management system certification

Execution standard: GB/T19001-2016

Quality is like gold, able to withstand the test of time; Quality first, win customer trust.

NEW!

A comfortable seat cushion is the "decompression tool" for cycling

Preferred accessories to enhance cycling experience

- Adapting to multiple mainstream models, balancing practicality and aesthetics, it can stimulate your riding pleasure.
Make every departure more comfortable and enjoyable!

Product development philosophy

Mingzhen seat cushion has numerous motorcycle modification and research projects, including diversified categories such as tailstock/trunk/seat cushion/shock absorber/sponge. Always keep up with the pace of the market and motorcycle enthusiasts, constantly innovate and reform, and provide everyone with better products and first-class service experience.

Principles of Ergonomic Design

Ergonomic design, seat cushion curvature, thickness, and support distribution should conform to the curve of the buttocks, disperse pressure, and reduce fatigue from long-term cycling. Dynamically conforming to spinal curves, modular customization system, redefining riding comfort standards.

Pay attention to every detail

Prioritize the use of high-density and high rebound sponge or breathable materials, with sponge breathable and shock-absorbing structures to enhance load-bearing capacity and breathability. Some products use texture treatment on the surface to avoid stuffy and sticky riding in summer.

Ultimate security and durability

The use of waterproof and wear-resistant fabrics and reliable hardware metal connectors requires rust prevention treatment to ensure stability in humid environments; Anti impact materials can reduce body impact during emergency braking. Escort every trip for you.

Vehicle wide adaptability

Different car models require specialized seat cushions: off-road motorcycles tend to have hard high seat cushions, while road motorcycles place more emphasis on soft and comfortable comfort. When modifying, it is necessary to consider the compatibility of the original vehicle structure, and modular design facilitates non-destructive installation.

Integrating technology and aesthetics to create
an excellent cycling experience
